European Composite
Technology

Parallel Event:

HYBRIDExpo

The latest materials solutions and process technologies for your business!

Connecting with the future: innovative materials are the key to success.

There is no shortage of know-how and leads at COMPOSITES EUROPE.

High demands: lower costs, fewer emissions, reduced weight. But these can only be achieved with some „more“: more interaction between theory and practice, more hand in hand between research and business.

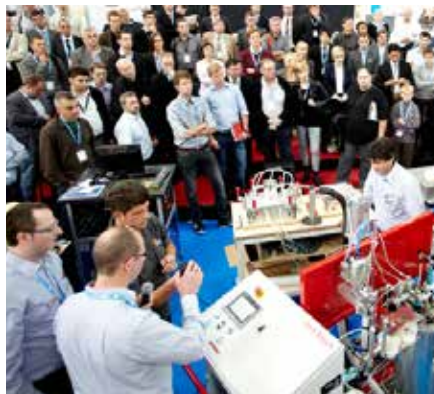

Are you a designer or technician, scientist or researcher, purchaser, supplier or OEM manager? Then come to Stuttgart. Don't look for solutions – come and find them at COMPOSITES EUROPE 2013 while taking in new ideas from the entire value chain.

COMPOSITES EUROPE 2013:

- 445 exhibitors*
- 11,000 visitors*

1 vision: The best contacts to shape the future.

* expected numbers

The key for long-term success!

New processes for automated production and mass production are the key for long-term success. In close partnership with the Forum Composites Technology of VDMA – Verband Deutscher Maschinen und Anlagenbau, the European Composites Industry Association (EuCIA) and the Federation of Reinforced Plastics (AVK e.V.), COMPOSITES EUROPE supports the industry as its central technology and networking platform. In the media sector, the international trade magazine "Reinforced Plastics" promotes the trade fair on a global level.

International know-how

Get ahead of the competition by picking up all the latest information at the International AVK Conference: 500 experts discussing current topics.

HYBRID Expo

Hybrid components, their technologies and applications in the spotlight

The co-located exhibition presents multimaterial solutions designed to meet the current challenges of resource efficiency, integration of functions and reduction of processing times.

HYBRIDExpo

Don't miss out!

As the international industry meeting place for producers, processors and users as well as service providers, COMPOSITES EUROPE is one of the major catalysts for innovations in the composites industry. It is a scene to present current practice, a forum for the future and a platform for networking, all in one – and hence the perfect place for sustainable business and pioneering deals.

Get a comprehensive overview of the entire world of composites on site. Concentrated, efficient, and at the same time comprehensive and future-oriented.

Discover innovative products, visionary processes and sustainable procedures presented by approximately 450 exhibitors from 25 countries at their stands and in the special shows.
